ALLOWANCE

An RCE was filed with an IDS on 4/18/08.

The following is an examiner's statement of reasons for allowance: the claimed invention is distinguished over the prior art of record in that the prior art does not teach the specific composition of the absorber layer of a reflective mask and a reflective mask blank comprising a substrate on which a reflective layer for reflecting exposure light in a short-wavelength region including an extreme ultraviolet region and an absorber layer for absorbing the exposure light are successively formed, the absorber layer having an at least two-layer structure including as a lower layer an exposure light absorbing layer comprising an absorber for the exposure light and as an upper layer a low-reflectivity layer comprising an absorber for inspection light used in inspection of a mask pattern, the upper layer being farther from the substrate than the lower layer, wherein: the upper layer is made of a material containing tantalum (Ta), boron (B), and nitrogen (N), the content of B being 5 at % to 30 at %, the ratio of Ta and N (Ta:N) falling within a range of 8:1 to 2:7.

The prior art cited on the IDS does not teach the composition including Boron as recited above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
